SUMMARY

Software engineer with 2+ years of experience in data engineering and backend development with a strong interest in selfhosting, distributed systems, observability and automation seeking full-time system infrastructure role.

RELEVANT SKILLS

Operating infra AWS, GCP, Ansible, Terraform, Kubernetes, Nagios, Prometheus, ELK

Managing systems Containers&VMs, General linux systems skills

Handing distributed systems RPC, decentralized databases, consensus protocols, message brokers, caching, P2P

Network&Security SSH, Wireguard, Network troubleshooting

Tools&Automation Golang, Python, C, JavaScript, Lua, Bash, Sed, Awk, CI/CD systems and CLI tools.

Managing code and docsGit, mercurial, common build systems, org-mode, markdownWorking with databasesPostgreSQL, MongoDB, SQLite, Redis, DB performance tuningData engineeringKafka, Airflow, PyData stack, Datasette, Metabase, other fun tools.

Basic web applications TypeScript, React, HTML5, CSS

Complex web applications Browser performance

Building backends Golang, NodeJS, Python, Ruby (Frameworks as required)

RELEVANT EXPERIENCE

Data Engineer Clarisights

August 2020 — March 2022 Banqalore, IN

- Executed the design and implementation of several integrations to the ETL pipeline, ensuring optimal efficiency in data reading and writing. This mostly involved Ruby, MongoDB and PostgreSQL along with some Python with a pinch of Airflow and custom DSLs as seasoning.
- Was part of weekly on-calls addressing both system and customer issues. Built integrations in the stringent deadlines which helped in securing key business partnerships for the company.

Google Summer of Code Student

CNCF/Prometheus (follow-up)

May 2019 — August 2019

- Remote
- Worked on refining the release benchmarking system for Prometheus called Prombench. This involved working with Grafana, Containers, Kubernetes(GKE), CI/CD systems and lots of Go.
- The outcome of this effort was a heightened level of scrutiny into the Prombench system, providing developers with increased flexibility to compare different Prometheus versions with greater precision.
- Later I started maintaining this project, but life, as it often does, threw me a curveball and I had to step away.

SysAdmin Intern

Free Software Foundation (follow-up)

August 2018 — December 2018

Remote

2017

• I evaluated the feasibility of replacing the Nagios with Prometheus. My primary responsibilities included the development of Ansible roles and create various scripts to support the implementation using python, shell scripts and go.

Freelance SWE

Individual Contributor

November 2015 — Present

Remote

- Delivering functional, readable, well tested code with clear documentation for a diverse range of clients globally.
- Previously worked with customized web application solutions, extensions/plugins, automation scripts/bots/scrapers.

RELEVANT PROJECTS

threesixfive daily A digest that refreshes daily from a curated database (check it out)

2022
twitmarks tw bookmarks when bookmarks were not available on the web (source)
